The Importance of MILD Combustion, Biogas and The Impact on The Global War

21 October 2020

The energy demand is dramatically increasing due to the growth of the world's population ar
in Brazil, Russia, China, and India. The combustion of fossil fuel is projected to fulfil about 75
significant challenges are to provide efficient energy and limit greenhouse gas (GHG) e
increase the earth's temperature, create unstable weather, increase ocean levels, and ice me
