NLP Benefits PT3 and SPM Candidates

Thu, 03/01/2018 - 12:52

Pekan, 4 February – Nearly 148 Form 3 and Form 5 students from Sekolah Menengah Kebangsaan Seri Pekan (SMKSP) gets first hands experience applying Neuro-Linguistic Programming (NLP), in a Kilauan Mutiara Project with 24 InSmartive members from Universiti Malaysia Pahang.

Modules for each programmes and activities organize by InSmartive and Student Affairs & Alumni Department (SAffAD) will be using NLP. NLP is designed to enhance student's confidence level in making wise decision in academic or career for the sake of their future.

Project Manager, Rafiqah Shahul Hameed, 21, from Faculty of Computer Systems & Software Engineering said, modules has been designed in accordance with six aspiration in Malaysia Education Blueprint 2013-2025, in which to develop higher-order thinking skills in nurturing creative thinking and innovation mind.

As for Hajah Nik Zaitun Abdullah from SMKSP said, this unique and new approach applied by UMP is good and it is hope that it can motivate the students to work harder and smarter for their upcoming PT3 and SPM examination.
