UMP, SIASUN Seal Strategic Collaboration in R Services Development

The strategic collaboration between Universiti Malaysia Pahang (UMP) and SIASUN Robot & Automatic which is a high-tech company, will form a value chain that encompasses core technologies and componen particularly in the robotic-related service industries.

Today, the global market value of SIASUN is the third in the robotics industry with the fastest growth rate.

This collaboration will focus on the development of expertise in teaching factory model to support the init (MOE), namely University Teaching Revolution Factory (URTC) related to the Fourth Industrial Revolution (

The signing ceremony of the Memorandum of Understanding (MoU) was represented by the Vice-Change Wan Yusoff and the Chief Executive Officer of SIASUN, Mr. Zhao Chen, on 5 November 2019.

Also present were the President of SIASUN Education Shenyang, Cun Yan Fan, the Deputy Vice-Chancell Dr. Mohd Rosli Hainin and the Vice-President of Teutloff German TVET Institution, Andy Pan.

According to Professor Ir. Dr. Wan Azhar, this collaboration is a continuation of SIASUN's visit to UMP rece

"This collaboration will train skilled workers to strengthen skills and training in the high level of Techni (TVET), along with the lifelong learning programmes through strategic collaboration with global companies.

"In developing a sustainable ecosystem of high impact technology innovations, UMP also partners (SAPURA) for the project of Asia Center of Excellence for Smart Technologies (ACES) based in Singap China.

He hopes that the collaboration will open up strategic collaboration opportunities to adapt more relevant, remethods that everyone can benefit from.

The delegates of UMP and SAPURA also had the opportunity to visit several high-tech industrial robotic lab

A discussion was also held on the collaboration in academics and research with the Shenyang Institute of SIASUN Research and Development Centre and the Liaoning University of Technology.

Joining the delegation were the Senior General Manager (Technical & Operations) of Sapura Industrial Centre of Industry and Community Network (ICoN), Associate Professor Ir. Dr. Nurul Hazlina Noordin a Halim Baharom.

UMP Awarded with SEDA Accreditation for E

Universiti Malaysia Pahang (UMP) bagged the One Diamond Award for Low Carbon Buildings Assessm Authority (SEDA) on December 13, 2019.

UMP became the first university in the country to receive such an award for efforts taken that had succes energy consumption, the use of renewable energy and reduce carbon dioxide gas emission.

Green practice initiatives among Malaysians are highly encouraged especially when implementing 'energy's

'Energy efficiency' is the ultimate goal in effective and optimal energy consumption management, thus redu

Among the 'energy efficiency' practices that can be implemented are by replacing less efficient elect decreasing burden on mechanical equipment as it requires more energy to function, upgrading the roofing having a good ventilation system and using energy-saving control systems for all electrical appliances.

UMP Energy Focus Group Leader, Professor Ir. Dr. Hassan Ibrahim said energy efficiency was often asso order to complete certain work and to increase the chances of saving and avoiding wastage.

"By applying energy conservation concept, it involves three categories – energy saving exercises with no co

"To date, UMP is only applying energy saving practices through the concept of no cost and low cost.

"The university has managed to reduce carbon dioxide emission by 7.89 percent, which is equivalent to 8 save power up to 1,273,585 kWh at its UMP Pekan Campus.

"It is a result from the awareness among campus community to conserve power in campus and througattitude and discipline about the importance of sustainable energy," he said.

In a move to ensure energy sustainability, the Unit of Sustainable and Green Campus was established und Development (PPPH) so energy management could be carried out in line with that of the university's aspira

Other initiatives implemented in UMP included the installation of various devices such as the Building lighting system in all toilets, timers at all walkways, a 'master switch' at bigger buildings and solar panels as replacing of light bulbs to the energy-saving ones.

UMP has also taken the initiative in energy management by setting air-conditioning temperature at 24 d saving in energy consumption without compromising the comfort of the users.

The university has embarked on energy management and conservation initiatives since 2012 and to date, measures have been implemented, in a bid to reduce carbon dioxide emission in UMP Pekan Campus.

These efforts have also contributed to the university's achievement in the UI-GreenMetric World Ranking 2 was positioned at the 76th place in the world listing.

The rating was based on the measures taken in managing campus sustainability and environment that were Setting and Infrastructure, Energy and Climate Change, Waste, Water, Transportation and Education.
