[High-level disinfectant can kill human coronavirus in 30 seconds](#)

25 August 2020

Kuantan, 18 August 2020 - Researchers from the Faculty of Civil Engineering Technology (UMP) successfully developed a high-level disinfectant (HDL), Diaclean Pera Sterilant with peracetic acid from food vinegar that can kill 99.99% of microorganisms such as bacteria, virus and fungi.

Professor Dato' Dr. Zularisam Ab Wahid, who led the research, said this disinfectant has been tested in an international laboratory Viroxy Lab.

Uplifting Communities Through Digital Literacy in the Malaysian Context: The

28 August 2020

The education transformation generally begins with DIGITISATION in education, involving the preservation of knowledge. Today, more than ever, the learning materials are converted into digital formats. As more knowledge is available through digital learning using various technical tools, the greater number of data can be presented in a more creative and interesting way. For example, creative animated learning materials covering theoretical knowledge such as science and English can be presented in a more interestingly and interactively.
