UMP researcher produces milk coagulant using a mixture of extract of three local

Thu, 09/10/2020 - 16:20

Kuantan, 8 September 2020 - Milk coagulation is the first process for the production of chee
enzyme extracts from the stomach of unweaned young animals such as calves, kids and pigl

Looking at this situation, the lecturer of the Faculty of Science and Industrial Technology (
Vejayan Palliah produced milk coagulant using a mixture of extracts of three local fruits, nam
