Dr. Wan Isni Sofiah develops algorithm for saving battery usage

Fri, 10/30/2020 - 09:35

Kuantan, 26 October 2020 - Batteries are an important element for wireless sensor nodes to transmitting data.

If the algorithm to minimise battery usage is not emphasised, the lifespan of a sensor will b especially when used in areas without electricity supply such as for forest monitoring opera farms, and military activities in the forest area.
