River Water Quality Issues in Malaysia

Thu, 03/11/2021 - 09:41

Rapid urbanisation and population growth have contributed both to an ever-increasing dema
same time, to the level of water pollution in Malaysia. The quality of water in Malaysia, as w
major concern. Lakes and reservoirs act as domestic, commercial, agricultural, hydroelectric
resources. As 98% of water comes from rivers (Chan, 2012), rivers' pollution is a real pro
polluted.
