ChM Dr. Nurlin produces SORAS to remove arsenic in contaminated water

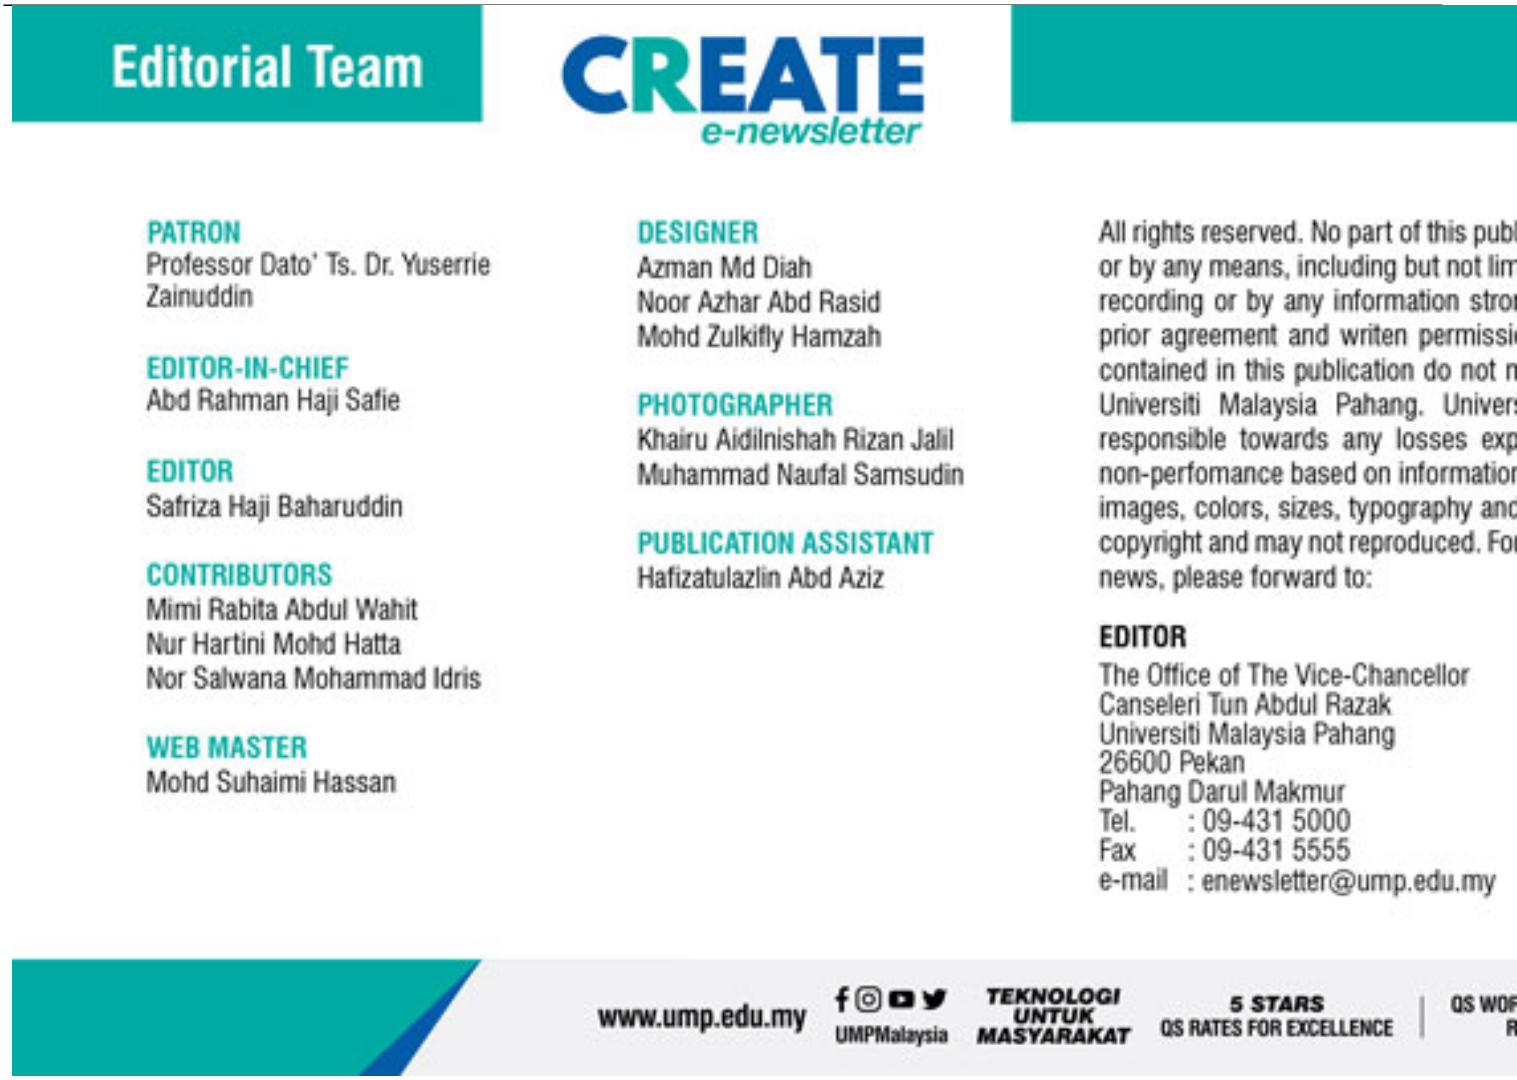

Thu, 07/07/2022 - 11:08

PEKAN, 5 July 2022 – Water pollution especially from landfills often contains toxic an harmful to health in the long run.

Looking at this problem, a lecturer from the Faculty of Industrial Sciences and Technology (UMP), ChM Dr. Nurlin Abu Samah, 38, came out with a product capable of making contaminated water.

A product named SORAS is an adsorbent used to remove arsenic in contaminated water.
