[Transcending Future Language Learning via Virtual R](#)

27 October 2023

JAPAN, 6 October 2023 - Virtual Reality (VR) has evolved rapidly from two-dimensional environments to a more sophisticated three-dimensional (3D) virtual space.

The recent studies have even classified VR into low-immersion VR and high-immersion VR.

Learning a language is more effective when it occurs in a context as it creates authentic and meaningful for the learners.
