Transcending Future Language Learning via Virtual Reality

27 October 2023

JAPAN, 6 October 2023 - Virtual Reality (VR) has evolved rapidly from two-dimensional environments to a more sophisticated three-dimensional (3D) virtual space.

The recent studies have even classified VR into low-immersion VR and high-immersion VR.

Learning a language is more effective when it occurs in a context as it creates authentic environments that are meaningful for the learners.

Revolutionising Higher Education: The Significance of Micro-Credentials in Environment - A Success Story from UMPSA

10 November 2023

The higher education landscape in Malaysia has undergone rapid transformation in recent years, driven by technological advancements and evolving workforce needs. To keep up with global educational trends, Malaysia has incorporated the concept of globalised online learning into its national agenda, as outlined in the National Higher Education Policy 2015-2025.
