Research

UMPSA researcher Associate Professor Ir. Dr. Chin Siew Choo produces Breve cement from coffee waste

26 August 2025

PEKAN, 18 August 2025 – Looking at coffee waste, the by-product of the brewing process, researchers have found a way to turn it into a sustainable building material called Brewcrete.

Malaysians who drink an average of 2.38 cups of coffee a day (totalling around 3 billion cups daily), generate about 1,600 tonnes of coffee waste per day, a team of researchers from Universiti Malaysia Pahang Alim Syarif (UPA) has discovered.

The research was led by Dr. Nur Hafizah Yusoff, an assistant lecturer from the Faculty of Civil Engineering Technology (FTKA), Associate Professor Ir. Dr. Mohd. Fauzan Yusoff, and Dr. Nur Hafizah Yusoff.

From Letters to Literacy: Empowering Preschool Teachers to Implement the Series Using the CREATIVE Approach

4 August 2025

The importance of English proficiency in Malaysia has always been emphasized, more so in our national aspiration to remain globally competitive. English is not only a second language but also instrumental for accessing knowledge, communicating and negotiating, as well as beyond national borders. As we look at efforts to improve English language education across the country, one area that requires attention would be early childhood educators.
