Bridging Universiti Malaysia Pahang to the world community

UMP ranked 134th in Asia

By : HAZLINA FAIZAL, CORPORATE AND QUALITY AFFAIRS CENTRE

Translation by : DR. ROZAIMI ABU SAMAH, FACULTY OF CHEMICAL AND PROCESS ENGINEERING T

Universiti Malaysia Pahang (UMP) achieved a remarkable accomplishment when ranked at 134th spot in University Rankings 2020.

The continuous climb in five consecutive years also makes UMP as the first university in the Malaysian T to place itself in the 150 best universities in Asia.

UMP had climbed 54 spots this year from 188th last year.

The improvement covers graduate employability, networking and industrial collaboration, and international s

The 11 indicators used to compile the QS Asia University Rankings are Academic Reputation, Employer Reputation, Faculty/Student Ratio, International Faculty Ratio, International Students, International Research Network, Citations Per Paper, Papers Per Faculty, Staff with a PhD, Proportion of Inbound Exchange Students, and Proportion of Outbound Exchange Students.

Various international initiatives will be continuously implemented by UMP to excel in the future, including teaching and learning, research, and industrial networking.

In this 2020 edition, UMP has improved in almost all the assessment criteria outlined by Quacquarelli Symonds.

The overall results of QS Asian University Rankings 2020 can be accessed via <https://www.topuniversities.com/rankings/2020/asia>

UMP, SIASUN seal strategic collaboration in robotic and smart manufacturing

The strategic collaboration between Universiti Malaysia Pahang (UMP) and SIASUN Robot & Automatic which is a high-tech company, will form a value chain that encompasses core technologies and components particularly in the robotic-related service industries.

Today, the global market value of SIASUN is the third in the robotics industry with the fastest growth rate.

This collaboration will focus on the development of expertise in teaching factory model to support the initiative (MOE), namely University Teaching Revolution Factory (URTC) related to the Fourth Industrial Revolution (

The signing ceremony of the Memorandum of Understanding (MoU) was represented by the Vice-Chancellor, Prof. Dr. Wan Yusoff and the Chief Executive Officer of SIASUN, Mr. Zhao Chen, on 5 November 2019.

Also present were the President of SIASUN Education Shenyang, Cun Yan Fan, the Deputy Vice-Chancellor, Dr. Mohd Rosli Hainin and the Vice-President of Teutloff German TVET Institution, Andy Pan.

According to Professor Ir. Dr. Wan Azhar, this collaboration is a continuation of SIASUN's visit to UMP recently.

"This collaboration will train skilled workers to strengthen skills and training in the high level of Technical Vocational Education and Training (TVET), along with the lifelong learning programmes through strategic collaboration with global companies.

"In developing a sustainable ecosystem of high impact technology innovations, UMP also partners (SAPURA) for the project of Asia Center of Excellence for Smart Technologies (ACES) based in Singapore and China.

He hopes that the collaboration will open up strategic collaboration opportunities to adapt more relevant, more effective methods that everyone can benefit from.

The delegates of UMP and SAPURA also had the opportunity to visit several high-tech industrial robotic laboratories.

A discussion was also held on the collaboration in academics and research with the Shenyang Institute of Automation, the Siasun Research and Development Centre and the Liaoning University of Technology.

Joining the delegation were the Senior General Manager (Technical & Operations) of Sapura Industrial, Associate Professor Ir. Dr. Nurul Hazlina Noordin and Associate Professor Ir. Dr. Halim Baharom.

MTUN – Industry smart partnership produce technology

Translation by: NADIRA HANA AB HAMID, FACULTY OF MANUFACTURING AND MECHATRONIC ENGINEERING

Malaysia Technical University Network (MTUN) is urged to continue working with the industry to ensure that the industry related issues.

According to Deputy Director General, Department of Higher Education, Ministry of Education, Professor Dr. Mohd. Salleh bin Mohd. Salleh, the universities smart partnership particularly with MTUN should be intensified to encourage the industry to contribute their expertise and equipment as practiced in developed countries.

"This is what Taiwan, Korea or Germany has been doing all this time with their smartphone technology. The university-industry smart partnership could be implemented so that every research could benefit all parties."

In addition, the new focus of the country's education was on Technical and Vocational Education and Training, facing greater challenges facing as a result of the Industrial Revolution 4.0 (IR4.0) explosion.

He is proud of UMP's first attempt to address this challenge with the implementation of the IR4.0-based team

Professor Dr. Mohd Cairul Iqbal officiated the opening ceremony of the 11th Malaysian Technical Universities (MUCET). MUCET, hosted by Universiti Malaysia Pahang (UMP) was held at Bukit Gambang Resort Kuantan.

With the theme 'Communitising Technology in the Context of Industrial Revolution 4.0' this MUCET conference gathered students, industry players and academics from UMP, Universiti Tun Hussien Onn Malaysia (UTHM), Universiti Teknikal Malaysia Melaka (UTeM).

The ceremony were also attended by UMP Board of Directors, Professor Dato' Dr. Rosli Mohd. Yunus (Research and Innovation), Professor Dr. Kamal Zuhairi Zamli and Deputy Vice-Chancellor (Student Affairs and Alumni), Prof.

Director of UTHM Research Management Centre, Professor Dr. Mohd. Amri Lajis, Director of UTeM Centre for Research and Innovation (CRIM), Professor Ir. Dr. Marizan Sulaiman and Deputy Dean of Research Management and Innovation (RMI) were also in attendance at the event.

Keynote speaker for the conference were Professor Seeram Ramakrishna from National University of Singapore, Dr. Rani from Techno Diverge Link Sdn. Bhd. and Mohd Parid Sulaiman, Director of Product Technology Development.

A Memorandum of Understanding (MoU) was also exchanged between UMP and BI Technologies Sdn. Bhd., Supercat International Sdn. Bhd. UMP was represented by Deputy Vice-Chancellor (Research and Innovation), Professor Dr. Kamal Zuhairi Zamli, UTeM represented by Director, Mr. Mohd Podzi bin Haji Mahmud, Sime Darby Bhd. represented by Director, Mr. Mohammad Saiful Nidzam Ismail and Supercat International Sdn. Bhd. represented by Director, Mohd Dzulkefly bin

UMP students responsibly elect leaders

The students of Universiti Malaysia Pahang (UMP) are now more mature in choosing their representatives.

There was a change in the campus political landscape when the election was run fully by a committee comp

The chairman of the Student Election Council 2019/2020, Mohamed Al-Fateh Ab Razak was relieved when G

“Alhamdulillah, despite the rain, the polling process went uninterrupted from 9.00 am until 5.00 pm. The vot

In this election, 42 seats were contested with 14 general seats and 28 faculty seats.

Nine candidates emerged victorious unopposed.

The use of e-Voting since a few years ago facilitated the voting process with immediate results.

Muhammad Zufli Zuhari dan Nur Zarith Halisa Mohamad Sofi won the faculty seats for the Faculty of Indust

For the Faculty of Science and Industrial Technology, Wan Nur Ardini Che Wan Shamsul Akhbar dan Nur S

Meanwhile, Ee Hui En dan Mohd Haziq Hamid Khan won the faculty seats for the Faculty of Chemical Mu

Three faculties were uncontested, namely the Faculty of Electrical and Electronics Engineering Technolo Civil Engineering Technology (Nuraisyah Fikryah Muhamod) and Faculty of Computing (Mohamad Kh Sutrisno Karsono Sadiam).

Lim Sin Yin and Hafizul Fahim Mohd Roffi won for the Department of Electrical Engineering.

The seats for the Department of Industrial Engineering were won by Muhammad Hisyamuddin Abdul Aziz Low Chen Ping and Nurhidayah Norhazan won for the Department of Chemical Engineering.

Two departments were uncontested, namely the Department of Civil Engineering (Khong Sheh Ching and Engineering (Muhammad Muadz Khairul Rizan).

The 14 general seats were won by Muhammad Syahiruddin Mohd Sabri, Ahmad Rifqi Mohd Jerome Rinje, Che Muhammad Harith Ab Halim, Nurul Ishafira Ismail, Nik Athirah Nik Mahdi, Nur Amira Shafiqah Ismail, Zainurin, Amir Zuhaili Abdul Karim, Nur Ain Natasya Azman, Muhammad Nur Aqmal Nazri and Anis Nabilla.

The results were announced by the Deputy Vice-Chancellor (Student Affairs and Alumni), Professor Dato' Chancellor (Research and Innovation), Professor Dr. Kamal Zuhairi Zamli and the Dean of Student Department, Dr. Ahmad Johari Mohammad.

Professor Dato' Dr. Yusarie Zainuddin congratulated the successful implementation of this election with establishment of students union.

He expects students to continuously develop their leadership and management in student affairs towards enhancement of the university.

"Students are required to be mature and professional in handling student issues.

"As leaders, they must respect and apply the values and affection between students, and make JHEPA a better place for the students and help improve services in the university," he said.

UNITEN delegates visit UMP

By : SHALFARINA SHAHRIMAN AND MUHAMMAD AZLI SHUKRI, UMP PUBLISHERS.
Translation by : AMINATUL NOR MOHAMED SAID, FACULTY OF COMPUTING

A total of 22 Universiti Tenaga National (UNITEN) Library staff members attended a visit to the UMP Library.

The UNITEN delegation was led by Head of e-Resources Unit, UNITEN Information Resources Centre, Chief Librarian, Dzull Zabarrod Ahmad and UMP Press Director, Ts. Dr. Muhamad Mat Noor.

Mohd. Yazid said their visit this time was to find new ideas and innovations to improve the level of service transformation at the UMP Library.

"We are planning to produce a university publication and therefore, the need for this visit to get information

"Our presence is to gain insights or inputs and see for ourselves the processes needed to manage the university. Thankfully our goals have been achieved," he said.

The delegation took approximately three hours to hear information from the UMP Library and UMP Press.

Ts. Mohd. Najib, researcher-cum-entrepreneur formulates oily was

The issues of uncontrolled oily wastewater discharge and water pollution that affect the environment inspired Dr. Rozaimi Abu Samah, a Lecturer in the Faculty of Chemical and Process Engineering Technology, Universiti Malaysia Pahang (UMP), Ts. Mohd Najib Razali to develop a product to treat oily wastewater.

He successfully formulated MNRg-Treat via green technology that can be used to treat oily wastewater.

More interestingly, MNRg-Treat is a safe product to use than any other product in the market as the formulation is based on natural components.

According to Ts. Mohd Najib, the formulation is now complete and in the process of improving in terms of efficiency and acquisition of relevant certificates.

"This product acts as an agent for treating oily wastewater. Based on the concept of coagulation and flocculation, the product can remove oil and water from oily wastewater with a predetermined dosage."

"The process continues with mixing for MNRg-Treat to react with the wastewater."

"Oil filtration can be done after oil and water are separated," he said during a meeting in his office, MNRg-Treat Sdn. Bhd. at the Universiti Malaysia Pahang (UMP) Campus.

He hopes that this product can solve the problem of oily wastewater discharge to meet the environmental standards set by the government of Malaysia.

His team also provides consultation and analytical service for on-site and laboratory water testing.

This effort is the realisation of UMP aspiration in commercialising technology and to carry out research that benefit the environment and the people of Malaysia.

The research conducted since 2012 has been supported by several university research grants, including the Research Grant UIC161003 – Bio-Coagulant and Smart System for Sustainable Water Treatment and a RM500,000.00 grant from the Bumiputera Leadership Agenda Unit (TERAJU) under the Bumiputera Leadership Agenda Unit (TERAJU) to support the business development of MNRg-Treat Sdn. Bhd.

Recently, Ts. Mohd Najib was awarded the Researcher Entrepreneur Award at the Malaysia Commercialisation and Innovation Awards (MCIAs) 2019, organised by the Ministry of Science, Technology and Innovation (MOSTI) and the Malaysian Science and Innovation Council (MSIC). He received RM100,000 worth of prizes including trophy and certificate.

He was also the recipient of the Industry and Community Excellence Award (AKIM) 2019 under the category of Academic Staff Category during the UMP Quality and Innovation Day.

In the future, he, who is also a UMP alumnus, hopes to become the leading water treatment analysis service provider in Malaysia.

MNRg-Treat helps solve the issues of waste discharge by reducing the parameters below the standard set by the Department of Environment of Malaysia (DOE).

MNRg-Treat is commercialised by a start-up company MNR Multitech Sdn. Bhd. at RM35 per litre and RM70 per litre for 100 litres. The company is currently working to penetrate the future market through promotion at national and international exhibitions.

This product has won several medals at the Seoul International Invention Fair (SIIF) 2017, International Invention and New Product Exposition, United State of America (USA) (INPEX 2013), International Conference of Institutions of Higher Learning (PECIPTA 2017), Water Malaysia 2013 dan Global Agri Tech Summit 2019.

Researcher's Information

Name : Ts. Mohd Najib bin Razali

State of birth : Johor Darul Takzim

Academic background : M. Eng. (Chemical Engineering), UMP and B. Eng. (Chemical Engineering), UMP

Expertise : Environmental Engineering, Recycling Technology, Wastewater Treatment

The Importance of Data Analysis in Business

By: NUR SA'ADATUL AFZAN JUSOH, CORPORATE COMMUNICAION DIVISION

Having the means for data analysis in a business can increase the value and profit of a company in the future.

In fact, in the present digital era, security aspect and digital innovation have become essential features for a company to survive in the future.

According to Malaysia Airlines Berhad (MAS) Business Intelligent Insights data analyst Parjit Singh Ranjeet, data analysis can be used in various fields such as in terms of security, human resource development such as in terms of division of work and matching the task according to skills and experience.

Parjit Singh was one of the panellists invited to speak at the MBA Business Forum, an event held in conjunction with the 10th anniversary of the Faculty of Industrial Management (FIM) at the Zenith Hotel in Kuala Lumpur.

He shared some of his work experience in data application such as diversifying flight trend and identifying the most popular destination.

Another speaker, Chief Executive Officer of Vulsan X Dr. Prakash Christiansen, said online data would expand the business of the company.

“Private information can be easily leaked and will normally be used for certain organisations. The more sensitive the information, the higher the risks in private information getting exposed.

“The public is reminded not to be easily duped with certain words such ‘free’, for example, free downloads and free trials.

“In this era, we must not hesitate to pay a bit more for the sake of security,” he added.

Malaysian Digital Economy Corporation (MDEC)’s Strategic Corporate Chief of Strategy and Research, Dr. Mohd Firdaus bin Mohd Yusof said the agency’s role in implementing various programmes such as the #eRezeki and #eUsahawan involved a lot of data analysis.

FIM Dean, Dr. Fazeeda Mohammad said the MBA Business Forum was an annual event organised by the

"This time around, the forum is held in class live globally that involves three institutes from India, DJ Academy of Management Studies from Coimbatore, India and Periyar University Salem, Tamil Nadu.

"Other than being a platform where participants can exchange their ideas, it encourages collaborations among the industry and university.

"The programme aims at producing competent managers. They learn about the administrational and practical aspects of business and global thinking," said Dr. Fazeeda.

Programme Director, Dr. Suhaidah Hussain said sharing of ideas and experience by experts in the industry will help the students to understand the practical aspects of business.

"In this challenging business world and digital era, we hope the MBA programme will produce potential managers who can solve complex problems systematically and creatively.

"Now, data analysis is used by most companies in Malaysia," she said.

A participant and UMP postgraduate student Mohd Izzat Shafie@Mohd Alias said he hoped more of such programme will be enjoyed not only by the campus community but also the industries especially in facing the challenges in the business world.

Mohd Izzat is pursuing his studies in Masters' in Business Administration.

"The forum has been a very informative programme as the panellists are all experienced people in their respective fields. They have shared their knowledge and experience in using data analysis method to help manage a plan or make improvements to enhance the organisation's performance," he said.

"It also highlights the aspect of date security that is being given less attention by some parties which can give rise to many problems in the future," he said.
