Commemorating Maulidur Rasul

Translation by: DR. ROZAIMI ABU SAMAH, FACULTY OF CHEMICAL AND PROCESS ENGINEERING T

Muslims need to learn and commemorate Maulidur Rasul and the struggle endured by Prophet Muham
Islamic law.

The narration of the personality of Prophet Muhammad (pbuh) who always practised moderation must be e

The Deputy Vice-Chancellor (Student Affairs & Alumni), Professor Dato' Dr. Yuserrie Zainuddin said that and his companions blessed us with Iman and Islam today.

"The celebration of Maulidur Rasul is not just an annual event, but rather a manifestation of our love for F context of leadership.

"In the context of service, we as staff or students have a lot of lessons and values from the biography of t he said during the officiation of the university-level Maulidur Rasul celebration on 11 December 2019.

Also in attendance were the Deputy Vice-Chancellor (Academic & International), Professor Ts. Dr. Mohd and Human Development Centre (PIMPIN), Dr. Mahyuddin Ismail.

Themed '*Negara Rahmat Ummah Sejahtera*', this university-level Maulidur Rasul celebration gathered m involving 21 contingents at the Student Activities Centre, UMP Pekan.

The event was resumed with a special lecture by the Assistant Director, Division of Family Islamic Law, Pa Ustaz Muhammad Amin Abd Mutalib, entitled '*Mencintai Rasulullah Hingga ke Syurga*' and a qasidah fr Karang Kuantan.

UMP awarded with SEDA accreditation for Energy

Universiti Malaysia Pahang (UMP) bagged the One Diamond Award for Low Carbon Buildings Assessment Authority (SEDA) on December 13, 2019.

UMP became the first university in the country to receive such an award for efforts taken that had succeeded in reducing energy consumption, the use of renewable energy and reduce carbon dioxide gas emission.

Green practice initiatives among Malaysians are highly encouraged especially when implementing 'energy efficiency'.

'Energy efficiency' is the ultimate goal in effective and optimal energy consumption management, thus reducing energy waste.

Among the 'energy efficiency' practices that can be implemented are by replacing less efficient electrical equipment, decreasing burden on mechanical equipment as it requires more energy to function, upgrading the roofing system, having a good ventilation system and using energy-saving control systems for all electrical appliances.

UMP Energy Focus Group Leader, Professor Ir. Dr. Hassan Ibrahim said energy efficiency was often associated with cost saving in order to complete certain work and to increase the chances of saving and avoiding wastage.

"By applying energy conservation concept, it involves three categories – energy saving exercises with no cost and low cost.

"To date, UMP is only applying energy saving practices through the concept of no cost and low cost.

"The university has managed to reduce carbon dioxide emission by 7.89 percent, which is equivalent to 8,000 tonnes of CO₂ per year.

save power up to 1,273,585 kWh at its UMP Pekan Campus.

“It is a result from the awareness among campus community to conserve power in campus and through attitude and discipline about the importance of sustainable energy,” he said.

In a move to ensure energy sustainability, the Unit of Sustainable and Green Campus was established under the Program of Partnership for People's Development (PPPH) so energy management could be carried out in line with that of the university's aspirations.

Other initiatives implemented in UMP included the installation of various devices such as the Building Management System (BMS) for lighting system in all toilets, timers at all walkways, a 'master switch' at bigger buildings and solar panels for water heating, as well as replacing of light bulbs to the energy-saving ones.

UMP has also taken the initiative in energy management by setting air-conditioning temperature at 24 degrees Celsius to save energy and saving in energy consumption without compromising the comfort of the users.

The university has embarked on energy management and conservation initiatives since 2012 and to date, various measures have been implemented, in a bid to reduce carbon dioxide emission in UMP Pekan Campus.

These efforts have also contributed to the university's achievement in the UI-GreenMetric World Ranking 2020 where UMP was positioned at the 76th place in the world listing.

The rating was based on the measures taken in managing campus sustainability and environment that were categorized into six areas: Planning and Infrastructure, Energy and Climate Change, Waste, Water, Transportation and Education.

36 SPM leavers are excited to be at UMP

By: MOHAMAD HAKIMI KAMARUDDIN, CORPORATE COMMUNICATION DIVISION

Translation by : DR. ROZAIMI ABU SAMAH, FACULTY OF CHEMICAL AND PROCESS ENGINEERING T

A total of 36 SPM leavers along with five teachers from Sekolah Menengah Kebangsaan (SMK) Chiku 2, C
Universiti Malaysia Pahang (UMP) on 3 December 2019.

This two-day and one-night programme provided them with the boost to create success and path to univers

According to Zainuddin Yusof, the Principal of SMK Chiku 2, the programme was aimed to expose the s
institutes of higher learning (IHL) in line with their SPM results.

“I want them to make the best choice that must be based on the entry requirements and their interests in an

“To make it more meaningful, the students can experience the facilities in UMP, especially the technologi
and learning.

“UMP has been close to these students as several motivational programmes had been conducted especiall

According to Rabiatul Asyikin Mohd Zaki, 17, who participated in the programme, all students had the oppo
prepare for the future and make an informed decision about the course that they plan to enrol into.

“I feel delighted because not everyone has the chance to get into university.

“The two-day experience in UMP has been invaluable to us, and we hope the partnership between the scho

She added that UMP Library is appealing. It is not only a place to borrow books and find references but also a place for personal development after a long tiring day in classes.

They also had the chance to visit and try the facilities available in the library such as the karaoke room, video games, Xbox, and various high-tech games with the latest software.

The students also participated in a motivational programme with the cooperation of UMP students from InS.

Two new modules were introduced — Growth Mindset Challenge and Wheel of Fortune.

The contents of the modules were designed based on the six aspirations of the Malaysia Education Blueprint 2025: thinking skills, leadership skills, bilingual proficiency, ethics and spirituality, and national identity.

The excitement of joining this short visit catalysed their spirit to earn a place in university for pursuing study.
