[River Water Quality Issues in Malaysia](#)

11 March 2021

Rapid urbanisation and population growth have contributed both to an ever-increasing demand for water at the same time, to the level of water pollution in Malaysia. The quality of water in Malaysia, as well as the quantity, is a major concern. Lakes and reservoirs act as domestic, commercial, agricultural, hydroelectric, and recreational resources. As 98% of water comes from rivers (Chan, 2012), rivers' pollution is a real problem. Rivers are polluted.
