Ts. Dr. Norazlianie produces high-purity hydrogen gas for power industry

9 July 2021

GAMBANG, 6 July 2021 - Hydrogen is currently gaining the attention of many countries due to its high energy density and use in the energy industry.

Hydrogen gas is also very easily found in nature, such as from biomass and even water.

According to a senior lecturer and researcher from the College of Engineering, Universiti Teknikal Malaysia Melaka, Ts. Dr. Norazlianie Sazali, 32, hydrogen gas has been proposed as one of the long-term solutions for sustainable energy.

[Mottainai - Japanese Ancient Mantra in combating COVID-19](#)

9 July 2021

For more than a year, our country has been combating COVID-19, the number of infections has increased. The Recovery Plan remains in phase one, and everybody was asked to stay put at home. Movement control still needs to be implemented to curb the virus. In addition, the new variants are more contagious, have urged the government to tighten the standard operating procedures.
