Vol. 146 Sept. 2021: Salinity of our oceans can help us predict the effects of climate change?

<u>Experts</u>
Salinity of our oceans can help us predict the effects of climate change?
13 September 2021
Floods have lately wreaked havoc across Europe, while the Chinese city of Zhengzhou worth of rain in just three days. In contrast, high temperatures and droughts in northwest wildfires and killed hundreds of people. How about Malaysia during the monsoon season,
