

## 2. PFAS Regulatory Trends

Regulate more than 10,000 organofluorine compounds (PFAS) in a single package

### PFASの規制化スケジュール（推定）

欧州のREACHから規制が始まるが('26~'28)、ストックホルム条約の加盟国もその後規制される(日本もマレーシアも加盟国に入っている)

# TVET Courses Go Global: FTKKP's Global Classroom Welcomes Sanden Corporation Japan's Expert on Sustainable Lubrication Solutions for Industry

21 July 2023

Universiti Malaysia Pahang (UMP) is taking TVET courses to new heights through its Global Classroom initiative. Faculty of Engineering Technology Chemical and Process (FTKKP) recently

hosted Mr. Ando Satoshi, an expert from Sanden Corporation Japan, who delivered a talk on sustainable lubrication solutions for the industry.

The Course Coordinator Ts. Dr. Azizul Helmi focused on Alignment and Condition-Based Monitoring (CBM), generating student excitement. This course was conducted under the Bachelor of Technology in Oil and Gas Facilities Maintenance Program (BVF), FTKKP.

FTKKP's Global Classroom initiative provides students with global perspectives and real-world experiences. UMP aims to bridge academia and industry by inviting industry experts and equipping students for the global workforce.

The poster features a blue background with a large gear graphic. At the top left is the 'Global Classroom' logo with a globe icon. To its right are the logos for Universiti Malaysia Pahang (UMP) and TVET Malaysia. The main title 'SUSTAINABLE LUBRICATION SOLUTIONS FOR INDUSTRY' is in large, bold, light blue letters. Below it, '日本技術' (Japanese Technology) is written in Japanese, followed by the Sanden logo. The event date and time are listed: '7 JUNE 2023 (WEDNESDAY)' and '4:00 - 5:00 PM (MALAYSIA TIME)'. A QR code and the text 'JOIN US VIA MS TEAMS' are provided for registration. A white banner states 'Compulsory to students of BVF3224 Alignment & CBM'. The phrase 'All are invited!!' is prominently displayed at the bottom. On the right side, two speakers are featured: Mr. Ando Satoshi, Materials Engineer from Sanden, Japan, and Ts. Dr. Azizul Helmi, Head of Program (Student Development). The bottom of the poster includes various accreditation logos such as UMP Malaysia, TEKNOLOGI UNTUK MASYARAKAT, STARS, and others.

Mr. Ando Satoshi, representing Sanden Corporation Japan, shared his extensive expertise during the Global Classroom session. Mr. Satoshi's talk was highly anticipated as an authority on lubrication solutions. He provided insights into sustainable lubrication practices and their applications across industries, offering a unique learning experience. The talk highlighted the importance of sustainable lubrication solutions for optimal machinery performance, energy efficiency, and extended lifespan. By

---

adopting these solutions, industries can reduce waste and minimise downtime, enhancing productivity. Mr. Satoshi showcased the latest advancements and best practices in the field, enriching students' understanding of industry demands and trends.

The topic seamlessly aligned with BVF's courses focus on Alignment and CBM, emphasising real-time data and monitoring techniques to address machinery issues proactively. Integrating lubrication knowledge of CBM strategies gave students comprehensive insights into optimising performance and preventing costly downtime. Beyond the classroom, UMP's Global Classroom programme offers numerous benefits. It broadens students' perspectives, exposes them to global industry practices, and enhances cultural intelligence. Direct interaction with industry professionals allows students to build valuable networks and explore future collaborations or employment opportunities.

According to Muhammad Afif, a year three student, this talk broadened his view on the latest lubrication technology and improved his communication skills with foreign counterparts.

UMP's commitment to providing a well-rounded education aligns with the Global Classroom initiative. Mr. Ando Satoshi's talk on sustainable lubrication solutions further enriched the students' learning experience, solidifying UMP's position in TVET education. UMP empowers students to become global citizens equipped for successful careers by embracing global learning opportunities. The Global Classroom initiative exemplifies UMP's dedication to nurturing future industry leaders.
